

INFRASTRUCTURE to support economic recovery in Ukraine

The recovery of the Ukrainian economy is to be done from the perspective of EU-UA integration and based on the **Strategy for Business Recovery** for business entities of all organizational and legal forms, regardless of the form and structure of ownership.

The Strategy for Business Recovery includes guidelines for the development within its **sectoral** (agricultural sector, food industry, defense sector, energy, transport, construction, creative industries, medicine, recreation, etc.) (common to all sectors digitalization, ESG standards, energy efficiency, taxes, financial markets, conditions for the functioning of small and medium-sized businesses, cooperation, clustering, etc.) and **horizontal** components.

The **Rebuild Business Joint Platform** serves as a tool for the implementation of the Strategy for Business Recovery. It operates on the site of the **Chamber of Commerce and Industry of Ukraine (UCCI)**.

The initiative of the platform originates from the round table «Rebuild Ukraine Facility: how the cooperation among the state, civil society and business is to look like?» organized by PO ‘Analysis Centre of Agrarian Union of Ukraine’ (PO Ac AUU) supported through the EaP Civil Society Forum Re-granting Scheme and held in the UCCI November 11, 2022. Then on January 30, 2023 Larisa Starikova, the PO AC AUU head of the board and Andrii Zablovsky, secretary of the Council of Entrepreneurs at the Cabinet of Ministers established the ‘Rebuild Ukraine’ Viber group, where current information on directions, mechanisms and methods of post-war reconstruction of Ukraine was concentrated. At the stage of full functioning of the platform, this tool should be preserved and transformed into the **News section**.

The mission of the Rebuild Business Joint Platform is to provide free communication between the business presented in the format of variously formed projects and/or their packages (**Projects**) and providers of funds and other resources (**Resources**). Communication between providers and receivers of resources is direct and free from any artificial or additional barriers. Due to direct communication between owners of resources and their recipients the system is free from corruption and undemocratic decision-making, including distributing annexed resources of the Russian Federation.

Information on resources for business recovery is contained in the **database of providers**, structured according to their types (states, annexed assets of the Russian Federation, investment funds, donations, private business, etc.). Information on domestic business recovery projects is contained in the **database of projects** (projects of individual business entities, their consortia, clusters, cooperatives, project packages of business associations, of local self-government organizations, etc.). The platform also contains links to institutions accumulating packages of the business recovery projects (Governmental Recovery Plan of Ukraine, the DREAM system, etc.)

To make communication between business and providers of resources professional and successful, the Rebuild Business Joint Platform is immersed into **infrastructure** of a number of agencies accumulating professional services on a market base:

- **Project Bureau** accumulating services to assist businesses to develop recovery projects in accordance with EU and international standards and practices
- **Translation Agency** presenting a market of translation services
- **Property Assessment Bureau** exposing services of authorized entities regarding the assessment of losses and available business assets
- **Legal Chamber** presenting a range of legal services from documenting the right of claim to drafting the investment contracts
- **Audit Chamber** accumulating services on the due diligence, independent accounting reports etc.
- **Implementation Monitoring Agency** concentrating services related to independent monitoring and assessment of project implementation, delivering independent consumer examinations
- **Education Agency** accumulating training services on a range of issues concerning development and implementation of business recovery projects (project management, compliance with international standards, etc.)
